Re: Application number 10/518,477
Filing Date: 12/20/2004
Name of Applicant: Tom Kusic
Invention Title: TANDEM POWERED POWER TILTING AIRCRAFT

Attention: Examiner Mr. ROBERT P. SWIA TEK

The amendments to the specification, submitted June 14, 2007, were rejected due to non-compliance with required procedures.

After considering the number of amendments that were presented, I believe it would have been more appropriate to replace the whole specification with an amended specification. Accordingly, please find following an amended specification to replace the original specification. A clean copy of the amended specification, with pages numbered 1 to 30 follows, and a marked-up copy of the amended specification follows the clean copy, showing the changes that were made.

The differences between the original specification and the amended specification are explained below:

- 1/ In the amended specification I have added a section which provides a brief description of the drawings, which refers to the previous drawings and the new drawings. The brief description of the drawings commences on page 17 of the amended specification and continues to the end of page 19. A heading "BIEF DESCRIPTION OF THE DRAWINGS" has also been inserted on page 17.
- 2/ With the addition of six new drawings, which were submitted June 14, 2007, the detailed description of the drawings has been expanded so that it describes the new drawings as well as a the drawings that were originally filed and the descriptions of new drawings appear on the pages 29 and 30 in the amended specification.
- 3/ On page 2, at line 5, the word "manner" appeared as "mannner" and is now corrected.
